TECHNICAL SKILLS

Languages: [JavaScript, HTML, CSS, Python, Java] **Libraries/ Frameworks:** [Flask, Jinja2, Bootstrap, Spring Boot, ReactJS, Express, MVC] **Databases:** [MySQL, MongoDB] **Tools:** [AJAX, REST API, JSON, MySQL Workbench, Canva, Figma] **Version Control Systems:** [Git, GitHub] **Concepts/Methodologies: [**Agile, Scrum, OOP]

PROJECTS

Hello World News   [Live Site](#) | [GitHub](#)

A newspaper-style application using a news API to view the latest articles with the look of a newspaper using React framework.

- Built the single-page application using the React Framework to eliminate page loading for users.
- Replaced ES6 fetch with Axios library for its ease of use to get information from news API to display in the application.

Read Receipts   [Live Site](#) | [GitHub](#)

A receipt-inspired chat application using Socket-io for users to communicate with each other working with Java and Spring Boot for backend applications.

- Implemented the application using Spring framework configuring STOMP messaging to provide easy interoperability among many languages.
- Used Javascript client for sending and receiving messages from the server-side over WebSocket.
- Constructed a single web page using JSP (Java Server Pages) to create dynamic web content of all the messages and the creation of usernames.

Rentr   [GitHub](#)

A full CRUD online rental marketplace allowing users to rent out their belongings to other people using Python with Flask framework and MySQL Database.

- Used flask framework for fast implementations of features via Jinja2 template such as a user dashboard, varied logic for authorization, and flash messages.
- Developed a diagram for Data Structure and Entity Relationship using MySQL to store data created by users.
- Utilized BCrypt for back-end validations to deliver consistent data by the users to create, read, and update posts.

WORK EXPERIENCE

Hi-Tech Computer Rental   **Burbank, CA**
IT Support Technician   *2019-2022*

- Tested and maintained computers, printers, and tablets by correctly installing up-to-date software programs, and opening up more equipment for customers to rent.
- Organized hardware equipment to ensure a flexible company flow boosting a faster customer service wait time.
- Transformed the company's system by handling customer interactions by meeting customers' requirements and processing payments.

Express   **Glendale, CA**
Sales Associate   *2018-2019*

- Managed a department solely, by thoroughly communicating with the team and preparing products in a high-volume store.
- Boosted company sales through the engagement of customers, suggestive selling, and sharing product knowledge.

EDUCATION

Coding Dojo - Coding Bootcamp   *Feb 2022-Current*
Dedicated over 1000 hours of intensive hands-on training among 3 stacks - Python, Java, and MERN (MongoDB, Express, React, NodeJS)

California State University, Los Angeles (CSULA)   **Los Angeles, CA**
Bachelor of Science in Computer Information Systems   *Completed May 2020*
